WORK EXPERIENCE

Senior Software Developer

SharpHat - Englewood Cliffs, NJ

October 2017 to September 2019

Responsibilities included development and maintenance of web applications mostly using Web API, Knockout.js and SQL.

Work examples include:

- Converting a Web Forms/VB application to Web API/C#/Knockout.js
- Components of a web application that tracked NFL player injuries using, data grids, filters, Crystal Reports, etc.
- Components of a web application that displayed real-time NFL game statistics using SignalR
- Looking up location information from the cloud using Google Places API
- AWS Amazon EC2-enabled application components including uploading and downloading files, creating images and instances, remotely starting new servers
- Tracking employee hours and company revenues by connecting to the Atlassian JIRA ticketing system and displaying data using Highcharts JavaScript library
- Making user-interface responsive to mobile devices
- Also used jQuery, Bootstrap, SASS, various JavaScript libraries, Dapper, NLog, PrePros, Postman

Application Developer

Decusoft - Ramsey, NJ

January 2017 to August 2017

Responsibilities included enhancing and debugging an enterprise web application for compensation management used by external clients. Examples of work are

- Displaying real-time charts on the application landing page that allowed drill-down and filtering functions using the Highcharts JavaScript library.
- Generating an Excel spreadsheet populated with real-time data based on the user's data entitlements using the Infragistics JavaScript library.
- Migrating application from Web Forms to Web API and Knockout.js
- Other enhancements and bug fixes
- Used Web API 2, SQL Server 2012, Knockout.js, Sammy.js, AmplifyJS, Coffeescript, Bootstrap, Visual Studio 2012, SourceGear Vault, Jenkins Continuous Integration

Application Developer

LanguageWorks, a division of Ubiquis - New York, NY

February 2006 to May 2016

Was hired to develop applications for project management using Lotus Notes. Over several years, I progressively worked with .Net platform. Some of the work I was involved in are:

- Web Forms-based order-entry web application for external users that interfaced with legacy application. Later converted application to .Net MVC.
- Billing web application for third-party vendors.
- The LanguageWorks company website.
- Middleware tools that converted files from one format to another
- Programs for migrating data from Lotus Notes to 4D platform
- Visual Studio Tools for Office (VSTO) plugin for Outlook
- Used C#, MVC 4, Web API 2, Entity Framework 5, SQL Server 2008, jQuery, JavaScript, CSS, Ajax, JSON, WCF/web services, Windows Forms, Subversion, Visual Studio Tools for Office, Microsoft Outlook, regular expressions, SDL Trados, Lotus Notes, NUnit unit testing
- Provided desktop support and server administration in Windows environment.
- Provided tech support to local and overseas employees and partners.

Domino/Web Developer

JPMORGAN Chase & Co - New York, NY

January 1999 to November 2005

Provided technology solutions to users' business needs by delivering and managing applications. Responsibilities included analysis, development, testing and post-implementation support.

- Worked with end-users to gather requirements and provided tech support
- Application design and development based on user requirements using Lotus Notes/Domino, LotusScript, JavaScript, HTML, and other technologies as needed by the project
- As Operations Specialist, provided 2nd-level application support, maintaining the production environment of applications and deploying applications to production environments.

Lotus Notes Developer

Bankers' Trust - New York, NY

March 1998 to December 1998

Developed a Lotus Notes application that was used to manage the Year 2000 compliance testing project.

Solutions Engineer

Philippine Systems Products, Inc

July 1994 to December 1998

As Lotus Notes Solutions Engineer, tasked with developing Notes applications.

- Wrote programs for clients, developed a Sales Monitoring System for company use, and assisted clients in creating customized systems.
- On the sys ad front, provided technical support and training to internal and external client organizations.

Computer Programmer

WeServ Systems, Inc.

July 1993 to June 1994

Performed design, development, documentation and maintenance for some projects: A front-desk banking application and an accounting package application. Used Visual Basic and Cobol.

EDUCATION

Bachelor of Science in Computer Science

De La Salle University - Manila

SKILLS

LOTUS NOTES (10+ years), JAVASCRIPT (6 years), .NET (6 years), API (5 years), MS SQL SERVER (6 years)
