SKILLS

In the last several years, I've developed web and desktop applications mainly using Microsoft .Net technology. My objective is to leverage these skills as a .NET developer.

- Web API 2, ASP.NET MVC4, .Net Framework 4.5, Web Forms
- CSS, HTML, Bootstrap, SASS
- Knockout.js, JavaScript, jQuery, JSON, Ajax
- SQL Server 2012, T-SQL
- Visual Studio 2015, C# 4.5, Team Foundation Server, Git
- Internet Information Services 7.5

EXPERIENCE

Sharphat, Inc.

Englewood Cliffs, NJ

Senior Application Developer

Oct 2017 – Sep 2019

Responsibilities included development and maintenance of web applications mostly using .Net Framework 4.5, Knockout.js and SQL. Accomplishments include the following deliverables/features:

- Converting a Web Forms/VB application to Web API/C#/Knockout.js for the National Football League (NFL)
- Application components that monitored NFL players' health using data grids, filters, Crystal Reports, etc.
- Components that displayed real-time NFL game statistics using SignalR, XML, etc.
- Add Address-search features using Google Places API
- Uploading and downloading files, creating server images and instances, and remotely starting new servers in AWS Amazon EC2
- Tracker application for employee hours and company revenues that connected to the Atlassian JIRA ticketing system and displayed data using Highcharts JavaScript library
- Incorporating responsive design to support mobile browsers

Also used jQuery, Bootstrap, SASS, various JavaScript libraries, Dapper, NLog, PrePros, Postman

Decusoft

Ramsey, NJ

Application Developer

Jan 2017 – Aug 2017

Responsibilities included enhancing and debugging an enterprise web application for compensation management used by external clients. Examples of work are

- Displaying real-time charts on the application landing page that allowed drill-down and filtering functions using the Highcharts JavaScript library.
- Generating an Excel spreadsheet populated with real-time data based on the user's data entitlements using the Infragistics JavaScript library.
- Migrating application from Web Forms to Web API and Knockout.js
- Other enhancements and bug fixes

Used Web API 2, SQL Server 2012, Knockout.js, Sammy.js, AmplifyJS, Coffeescript, Bootstrap, Visual Studio 2012, SourceGear Vault, Jenkins Continuous Integration

LanguageWorks, a division of Ubiquis

New York, NY

Application Developer

Feb 2006 – May 2016

Was hired to develop applications for project management using Lotus Notes. Over several years, I progressively worked with .Net platform. Some of the work I was involved in are:

- Web Forms-based order-entry web application for external users that interfaced with legacy application. Later converted application to .Net MVC.
- Billing web application for third-party vendors.
- The LanguageWorks company website.
- Middleware tools that converted files from one format to another
- Programs for migrating data from Lotus Notes to 4D platform
- Visual Studio Tools for Office (VSTO) plugin for Outlook
- Used C#, MVC 4, Web API 2, Entity Framework 5, SQL Server 2008, jQuery, JavaScript, CSS, Ajax, JSON, WCF/web services, Windows Forms, Subversion, Visual Studio Tools for Office, Microsoft Outlook, regular expressions, SDL Trados, Lotus Notes, NUnit unit testing
- Provided desktop support and server administration in Windows environment.
- Provided tech support to local and overseas employees and partners.

JPMORGAN Chase & Co.

New York, NY

Domino/Web Developer

Jan 1999 – Nov 2005

Provided technology solutions to users' business needs by delivering and managing applications. Responsibilities included analysis, development, testing and post-implementation support.

- Application design and development using Lotus Notes/Domino, LotusScript, JavaScript, HTML, and other technologies as needed by the project

Bankers' Trust of New York

New York, NY

Lotus Notes Developer

Mar 1998 – Dec 1998

Developed a Lotus Notes application that was used to manage the Year 2000 compliance testing project.

Philippine Systems Products, Inc.

Makati City, Philippines

Solutions Engineer

Jul 1994 – Dec 1998

As Lotus Notes Solutions Engineer, tasked with development, maintenance and customization of internal and external Lotus Notes applications.

WeServ Systems, Inc.

Makati City, Philippines

Computer Programmer

Jul 1993 – Jun 1994

Performed design, development, documentation and maintenance for some projects: A front-desk banking application and an accounting package application. Used Visual Basic and Cobol.

EDUCATION

Bachelor of Science in Computer Science, Information Technology*De La Salle University*

Manila, Philippines

WORK AUTHORIZATION

U.S. Citizen
